

Democracy presumes a line between participants and outsiders, between legitimate and illegitimate. Only a fraction of the men could vote in ancient Athens; the Founding Fathers owned slaves. Citizenship still imposes a barrier between included and excluded, shutting over 10 million undocumented residents out of the decisions that shape their lives.

The liberal answer is to expand the lines of inclusion, extending rights and privileges until everyone is integrated into one vast democratic project. But as long as all power must flow through one bottleneck, there are bound to be imbalances and outsiders. The alternative would be *anarchy*: abolishing centralized power structures and all the borders they impose. Without borders, people would only live and work together of their own free will, flowing freely between communities without top-down control.
